Education

Visvesvaraya Technological University **DEC. 2020 – JUN 2026**

Bachelor of Technology in Computer Science *Kalaburagi, Karnataka*

Relevant Coursework

- Introduction to Web development
- Fundamentals of Full stack development
- Fundamentals of JavaScript
- UI/UX Design
- Database Management
- Introduction to backend
- Web Design

Experience

Code Alpha **May 2025**

Full stack Developer Intern *Virtual*

- Built a daily automated test service to run unit tests on in-development products, cutting time to identify and fix bugs through scheduled pipelines and reproducible runs.
- Wrote Python and PowerShell scripts to flash latest builds to hardware and aggregate XML test outputs into structured reports consumable by CI and dashboards.
- Orchestrated end-to-end CI with Jenkins to fetch latest code, deploy firmware and tests, execute suites, and publish a once-per-day results report; prototyped HTML/CSS/JavaScript visualizations and email summaries for stakeholders.
- Delivered additional projects during the internship: an e-commerce site, a social media app, and a project management tool; completed the internship certification and recorded lines of code (LoC) contributions for documentation and review.

Projects

e-Virtual study assistant | *HTML, CSS, JavaScript* **January 2025**

- Built a responsive student productivity platform using HTML, CSS, and JavaScript with fast client-side interactions and offline-ready notes caching.
- I Implemented lab notes module with search, tags, and filters to streamline study workflows and boost retrieval speed and time-on-task metrics.
- Added online courses section with structured learning paths and interactive UI components to increase engagement and session duration.

MedSync | *React, Tailwind CSS, Flask, Supabase (PostgreSQL)* **November 2025**

- Built MedSync, a blockchain-enabled hospital supply chain platform with Vite React + Tailwind CSS UI, Flask APIs, and Supabase (PostgreSQL) for persistence.
- Implemented smart contract–backed provenance, tamper-evident audit trails, and role-based access to ensure integrity, transparency, and security across procurement-to-dispatch workflows.
- Orchestrated end-to-end modules (inventory, vendors, shipments) with real-time status tracking, hashed records, and verifiable transactions integrated into clinical ops dashboards.

Typo | *React, Tailwind CSS, Node.js, Express.js, Supabase (PostgreSQL)* **May 2025**

- Developed full-stack web apps with React for the UI, styled with Tailwind CSS, powered by Node.js/Express APIs, and managed data/storage using Supabase (PostgreSQL).
- Designed and deployed secure authentication, scalable CRUD APIs, and responsive interfaces with seamless frontend-backend integration.
- Delivered and maintained modern apps optimized for performance, usability, and easy database access via Supabase client libraries.

Technical Skills

Languages: HTML, CSS, JavaScript, Python, SQL

Tech Stack: React, Tailwind CSS, Node.js, Express.js, Supabase (PostgreSQL)/MongoDB.

Developer Tools: VS Code, Git, GitHub.

Others: UI/UX Design, Web Design.
