PROFESSIONAL SUMMARY

Full Stack Developer with hands-on project experience in developing web applications using **Java, Spring Boot, React.js, Hibernate, and SQL**. Skilled in building RESTful APIs, implementing JWT-based authentication, role-based access control, and frontend-backend integration. Familiar with **System Design, HLD, LLD, and Microservices Architecture**, along with Apache Kafka and Docker. Strong foundation in **OOP, DSA, and DBMS**, with a focus on developing secure, scalable, and maintainable applications.

EDUCATION

B.Tech – Computer Science & Engineering **2022 – 2026**
VTU Centre for PG Studies, Kalaburagi *CGPA: 8.44/10*

TECHNICAL SKILLS

Programming Languages: Java, JavaScript

Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend Development: Spring Boot, Spring MVC, Spring Security, Servlets, Node.js, Express.js, RESTful APIs, Microservices Architecture

Databases & ORM: MySQL, PostgreSQL, MongoDB, Hibernate, Spring Data JPA, JDBC

Security: JWT, OAuth 2.0, Role-Based Access Control (RBAC), BCrypt

Messaging & DevOps: Apache Kafka, Docker, Jenkins, Maven

Testing & API Tools: Postman, Swagger, OpenAPI, API Testing, JUnit 5, Mockito

Version Control: Git, GitHub

Core Computer Science: OOP, Data Structures and Algorithms (DSA), DBMS, Operating Systems, Java Collections Framework, Exception Handling, Multithreading, System Design, SDLC, Agile

EXPERIENCE

Full Stack Developer Trainee – JSpiders | Bengaluru, India **Jan 2026 – Present**

- Developed full-stack web applications using **Java, Spring Boot, React.js, and SQL**, delivering end-to-end functionality across multiple application modules.
- Designed and integrated **RESTful APIs** for CRUD operations, improving frontend-backend integration and streamlining data processing workflows.
- Implemented secure authentication using **Spring Security, JWT, BCrypt, and RBAC**, strengthening application security and access control.
- Built applications using the **MERN Stack**, integrating frontend components, backend services, and MongoDB database operations.
- Executed API test cases using **Postman**, identifying defects, validating responses, and improving application reliability.

PROJECTS

FinancePro – Enterprise Loan Management System

Technologies: *Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, React.js, PostgreSQL, Apache Kafka, Docker*

- Developed **6 core loan management workflows** covering customer onboarding, KYC verification, EMI calculations, payments, penalties, and loan recovery.
- Built RESTful APIs for loan and payment operations, implementing database transactions, request validation, and exception handling to maintain data consistency.
- Implemented **JWT authentication, RBAC, and BCrypt password hashing** using Spring Security, integrating Apache Kafka for asynchronous event processing and Docker for containerization.

Carbon Calculator – Carbon Emissions Management System

Technologies: *Java, Spring Boot, Spring Security, React.js, Hibernate, MySQL, REST APIs, Swagger/OpenAPI*

- Developed an emissions management platform supporting calculations and monitoring across **3 emission scopes (Scope 1, 2, and 3)** for organizational carbon tracking.
- Developed and documented **20 REST API operations across 13 resource paths**, covering emissions, activity records, products, batches, and allocations.
- Implemented emission-factor calculations, input validation, **JWT authentication, and organization-level data isolation** to maintain calculation consistency and protect organizational records.

Enterprise E-Commerce Microservices Platform

Technologies: *Java, Spring Boot, Spring Cloud, Spring Security, JWT, JPA, Hibernate, MySQL, OpenFeign, Apache Kafka, Docker*

- Designed a microservices architecture comprising **7 business services** for authentication, users, products, orders, inventory, payments, and notifications.
- Configured **Spring Cloud Gateway and Netflix Eureka** for centralized API routing and service discovery, enabling communication across distributed services.
- Implemented secure REST APIs using **Spring Security, JWT, and OpenFeign**, integrating Apache Kafka for asynchronous event processing and Docker for containerized deployment.

CERTIFICATIONS

Java Full Stack Development – JSpiders, Bengaluru
